

SKI 4/8

Ventilated

8R

Refrigerated

APPLICATIONS

- BACTERIAL CULTURES AND YEAST
- SOLUBILITY STUDIES
- EXTRACTION PROCEDURES
- MIXTURES
- COLORING AND BLEACHING
- HYBRIDATION
- DIAGNOSTIC TESTS
- WASHING PROCEDURES
- PROTEINE PRODUCTION
- PLASMA PRODUCTION
- BIOLOGICAL ACTIVATOR

ArgoLab SKI 4 ,SKI 8 and SKI 8R are benchtop instruments that combine stirring and thermostating/cooling functions in one body, used for mixing liquids and incubating biological cultures.

The microprocessor ensures constant and optimal temperature control inside the chamber. The pre-chamber heating (and cooling in the refrigerated model SKI 8-R) , together with forced air circulation, ensure optimal temperature distribution throughout the useful working area.

The thermostating and stirring functions are totally independent, so the SKI can also be used as a stirrer only or an incubator only.

Large 8 mm thick plexiglass dome for optimal viewing of specimens without heat loss, equipped with gas springs for easy opening and safety switch.

Safety systems for over-temperature protection and adjustable fluid expansion safety thermostat.

Security class 3.1 (DIN 12880).

Gas springs and door switch

Controller

The easy and intuitive digital controller allows you to adjust:

ORBITAL STIRRING SPEED

In increments of 1 rpm (40 ... 300 rpm)

TEMPERATURE OF USE

With sensitivity up to 0,1 °C

USAGE TIME

With sensitivity to the minute (1 min - 99.59 hours or continuously)

The gradually increasing stirring function up to the set speed ensures **maximum safety of samples**.

The **various platforms available** allow maximum versatility of ArgoLab Orbital Shaking Incubators in its SKI 4 , SKI 8 and SKI 8-R models.

The SKI 4, SKI 8 and SKI 8-R instruments come standard with the **flexible spring platform** capable of accommodating different types of flasks, beakers and test tubes with different capacities; other platforms are also available: perforated for clips, with non-slip film with rubber bands and universal roller platform.

SUPPORTS

Flexible spring platform provided as standard

Support with adjustable rollers

Drilled support clips fixing

Non-slip support with elastic bands

DATA SHEET
