

LABSOLUTE® VOLUMETRIC FLASKS

clear glass, with PE stopper

The LABSOLUTE® volumetric flasks with accuracy class A are made from high-quality borosilicate glass 3.3 and have a standard ground joint. They are supplied with PE stoppers. The LABSOLUTE® volumetric flasks comply with DIN EN ISO 1042 and are calibrated to 'In' (20 °C). A batch-specific certificate of conformity can be supplied on request by quoting the AN number on the label and the retrace code on the flask.
